

Database CRUD Operations:

The abbreviation of CRUD extends to Create, Read, Update and Delete operation.

CREATE: The create command is used to create the table in the database.

```
SQL Query: CREATE table person(  
            PersonId int primary key,  
            First_name text,  
            Middle_name text,  
            Last_name text,  
            Age varchar  
)
```

It create the table of person

READ: Read operations are used to retrieve the content of a table or collection from a database

SQL Query: SELECT \* from person

Where \* means select all column from person table

SQL Query: SELECT First\_name, Middle\_name, Last\_name, Age from person

UPDATE: The update operation is used to modify the existing records in a table.

SQL Query: UPDATE person set First\_name='Leo' , Last\_name='Messi' where PersonId=1;

DELETE: The delete operation is used to delete existing records in a table.

SQL Query: DELETE from person where First\_name='Leo'
